Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's election with traverse of Species I in the reply filed on 2 May 2008 is acknowledged. The traversal is on the ground(s) that PCT rule 13.1 is inapplicable. This is not found persuasive because the expansion of downhole tubulars is well known in the art and no longer a general inventive concept. Each species define a inventive concept contributing the art of downhole tubular expansion.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 64 and 124-127 and 140 are rejected under 35 U.S.C. 102(b) as being anticipated by Boice, U.S. 2,482,962.

Boice discloses a sealed tool joint including a tubular sleeve (12) in circumferential compression (col. 2, lines 43-54) having a flange (11) and a first threaded tubular member (4, 1) and second threaded tubular member (7, 2) in axial compressive engagement -both abutting the flange (11). Boice discloses the upper and lower tubular sections (1, 2) having a larger or expanded internal

diameter with respect to the threaded region (4, 7) and unchanging to the extent that is not obstructed, constantly open.

Claims 159 and 163 are rejected under 35 U.S.C. 102(b) as being anticipated by Pogonowski, U.S. 4,319,393.

Pogonowski discloses all the claimed limitations including the first (13) second (12) tubular members plastically deformed into engagement with each other via a sleeve (14).

Allowable Subject Matter

Claims 133 and 134 are allowed.
